Summary of Work done the week (Attach supporting Documents):

Day 1: Installed Python and Jupyter Notebook, and learned about Python syntax, variables, and data types. Completed small exercises for familiarization.

Day 2: Practiced loops and conditional statements to automate repetitive tasks. Created simple programs for number checking and data processing.

Day 3: Learned about functions in Python and how to modularize code for reuse. Practiced reading and writing text files.

Day 4: Introduced to NumPy for handling arrays, indexing, and performing mathematical operations efficiently. Practiced using built-in NumPy functions.

Day 5: Started working with Pandas for reading CSV files and exploring datasets. Learned basic DataFrame operations like selecting rows/columns and filtering data.

Plans for next week:

Learn the python libraries and EDA.
